Team name:BugsOut

LAST PLATFORM

“Find the light. Follow the clues. Escape the station.”

GENRE	THEME	FOCUS
2D Atmospheric Adventure	Comic • Twist • Light	Mystery • Exploration • Survival

GAME CONCEPT

Last Platform is a 2D atmospheric adventure game combining **mystery, exploration, light horror, and comic storytelling** around the theme “Comic, Twist and Light.” The player takes the role of **Arin**, a young man who suddenly wakes up inside an abandoned and partially destroyed railway station. He has no clear memory of how he arrived there, and the station appears to have been deserted for a long time.

THE BASIC SCENARIO

At first, Arin's objective seems simple: **find a way out.** However, the station is not as empty as it appears. Strange sounds echo through the platforms, old railway announcements play without any obvious source, and unfamiliar figures can sometimes be seen moving in the darkness. As Arin explores deeper into the station, he begins to realize that something is following him.

THE JOURNEY

Players explore different parts of the abandoned station while searching for a way forward. Along the journey, they encounter mysterious objects, environmental obstacles, hidden areas, unusual events, and entities that do not behave like ordinary enemies. The station itself gradually becomes part of the mystery.

LIGHT

Light plays an important role throughout the experience. The darkness hides both danger and information. Light can help Arin understand his surroundings, discover things that may otherwise remain unnoticed, and interact with certain elements of the environment. But the player will gradually discover that **light does not always mean safety**.

EXPLORATION & PROGRESSION

The railway station is divided into several interconnected areas, each introducing new environmental challenges and pieces of the story. Early sections establish the atmosphere and familiarise the player with the world. As the journey continues, the surroundings become increasingly dangerous and unpredictable. Optional discoveries and side activities provide additional information for players who want to investigate further.

COMIC

Although the game has an eerie atmosphere, **Last Platform** is not intended to be completely dark or serious. The protagonist's reactions and important discoveries can be presented through **comic-inspired panels, speech bubbles, exaggerated expressions, and visual effects**. These moments add humor and personality while maintaining the game's mystery.

TWIST

The story is designed around discovery rather than giving the player all the answers immediately. As Arin progresses, small clues begin to connect seemingly unrelated events. Familiar locations may not remain familiar, and some encounters may not be what they initially appear to be. The player experiences these discoveries alongside Arin, allowing the mystery to unfold naturally.

VISUAL & AUDIO DIRECTION

The game will use a **2D comic-inspired art style** with a dark railway environment contrasted by strong sources of light. The visual language will combine atmospheric abandoned environments, strong light and shadow, comic panels, speech bubbles, exaggerated reactions, and stylized effects. Sound will support the atmosphere through distant railway noises, footsteps, announcements, environmental sounds, and subtle audio cues.

THEME INTEGRATION

The three theme elements are designed to work together rather than exist only as decoration.

COMIC	Comic panels, humorous reactions and visual storytelling.
TWIST	Mystery, unexpected discoveries and changing perceptions.
LIGHT	Exploration, atmosphere and interaction with the environment.

PLAYER EXPERIENCE

Last Platform is designed to make players feel **curious, cautious, and intrigued**. The player should constantly feel that there is something just beyond what they can see. The game begins with a simple question: *“How do I get out?”* As the player explores the abandoned station, that question slowly changes into something bigger: *“What exactly is this place?”* The full truth is left for the player to discover.

LAST PLATFORM

A forgotten station.
A mysterious passenger.
Something waiting in the dark.

Turn on the light.
